General

The Kitchen Maid line embodies all the newest and most important units of kitchen equipment. Each is complete in itself—may be used alone or in combination with other units. These units will fit into practically any size of space in kitchens already built, or may be built into

KITCHEN MAID combination made up (from left to right) of Utility Closet No. M6116D, Butlery Base No. M2136, Upper Section No. M1130, Sink Grille, Butlery Base No. M2136 and Upper Section No. M1130. Using tile table top and splash back built around a flat rim sink. Any of the other Kitchen Cabinets, Butlery Units or Side Units may be used. Total width of combination varies accordingly.

kitchens especially designed to receive them. The number of unit combinations is almost unlimited.

Kitchen Maid Units are built by specialists in kitchen equipment and represent the highest development of cabinet-making skill. They meet the architect's highest ideals. And, because of standardization and quantity production, the cost is less than built-in work of equal quality and completeness.

Corner combination consisting (from left to right) of full-depth Broom Closet No. M3116D, Butlery Unit No. M2130, Corner Unit No. M21C, Butlery Unit No. M2130 and full-depth Dish Cupboard No. M5116D. Any of the other Butlery Units, Kitchen Cabinets or Side Units may be used. Total width of combination varies accordingly.

General Description

The following specifications form a convenient, usable guide for the architect when he plans kitchens.

Materials—All units built of carefully selected, thoroughly seasoned, kiln-dried wood.

Front Frames—The 2" front frames allow doors to swing fully open.

Joining—All joints either mortised, dovetailed, or tenoned and carefully glued. Shelves mortised in.

Finish—Consists of two sprayed coats of undercoat and one sprayed coat of heavy oil-base satin enamel. Surface is carefully sanded and glazed after each coat.

Colors—Kitchen Maid Units are furnished in eight exclusive colors: Pastel Green, Dawn Gray, Travertine Ivory, Shasta White, Sunbronze Tan, Canary Yellow, Spanish Orchid, Horizon Blue. Each with tasteful decorations of contrasting colors.

Smooth Doors—Eliminate dust-collecting panels. 5-ply lumber core construction. Doors guaranteed not to warp or get out of line.

Rounded Inside Corners—All inside corners of Kitchen Maid Units are of rounded construction, leaving no square dirt-catching spaces.

Enameled Interior Bases—Always easy to clean and keep clean. Present a very attractive, finished appearance.

Table Top—Bolted Laminated Maple—practically indestructible.

Porcelain Table Tops—Kitchen Maid table tops are of stain proof vitreous porcelain. Guaranteed not to chip, crack or become stained by common usage.

Hardware—All catches and strikes in Kitchen Maid units are chromium plated cast brass. Hinges of steel chromium plated. Hinges are concealed, a patented

General Description, Continued

feature, and catches are all concealed except the handle.

Flour Bins—Made of heavy rustproof metal. Capacity 12½ lbs. Sifter attached to all bins.

Condiment Sets—Provide practical units for sugar, coffee, tea and spices. Made of sparkling glass.

Non-sag Shelves—All shelves in Kitchen Maid units are 3-ply panels, making sagging almost impossible.

Indestructible Drawers—Made of enameled heavy gauge steel with wood fronts. Exceptionally strong and rigid. One drawer in each cabinet is equipped with

felt lining for silverware. Drawer pulls are of black or white porcelain enamel over cast iron.

Refrigerators—All steel construction. Insulated with two inches of pressed Corkboard dipped in odorless asphalt. Doors are steel-clad with fine enamel finish. Each box equipped with Universal hangers for cooling coil and with boring for mechanical refrigeration.

Packing—Units carefully cartoned and crated at factory. No shipment leaves until given a final inspection and found in perfect condition.

This combination consists (from left to right) of Broom Closet No. M3116D, Kitchen Cabinet No. M1148, a regular 60" double Drain-board Apron Sink, Butlery Unit No. M2148 and Dish Cupboard No. M5116D. It shows the use of the standard units built around the standard type porcelain sink. Any of the other kitchen cabinets, butlery units or side units may be used. Total width varies accordingly.

Above is shown a dimensional drawing of a Kitchen Maid Kitchenette Assemblage.

These assemblages may be varied in width by changing refrigerator, sink or stove sizes. Arrangement may be varied to suit requirements by using other standard Kitchen Maid units.

Complete Kitchen Maid Assemblage around the sink consisting (from left to right) of Compressor Case No. M24CC, Refrigerator No. MR124, Top Unit No. M8124, Butlery Base No. M2124, Wall Case No. M9124, Sink Grille, Kitchen Cabinet Base No. M1148 and Wall Case No. M9148. This installation is equipped with tile splash back, ends and drainboards. Other Kitchen Maid units may be used to vary the width.

Telephone Niche

Telephone Niche. Built to fit into wall. Uses no floor space . . . Note comfortable seat. May be finished in Brown Mahogany or Walnut varnish; in Olive Green or Mandarin Red lacquer; or in two-tone Olive Green or Mandarin Red lacquer. Also available unfinished.

Kitchen Maid Divider Cabinets

Kitchen Maid Divider Cabinets offer practical arrangements for dividing kitchen and dinette. No. M63 (shown at right) is made with conventional panelled glass door. No. M62 made with wood panelled door decorated with carved wood design.

Kitchen Kraft Standard Units

This is a complete line of Lower Price Units distinguished by many of the features that have won favor for Kitchen Maid Units.

It offers the builder of lower priced homes or apartments the same adaptability of installation, remarkable compactness and convenient unit assembly that characterize the Kitchen Maid line. Just as in Kitchen Maid, metal drawers, operating in metal slides, insure easy operation. Panel door construction is employed throughout. The units are finished in your choice of eight beautiful enamels.
